# CRYPTO COLOUR

Decode the message below by using the crypto colour grid. Each letter has a unique code. E.g, if the code is "3", first notice the colour, then spot where "3" is placed on the grid. Where the colour and the number "lines" cross, there you will find the letter (i.e "3"= I). Have fun!

	1	2	3	4
Blue	D	V	U	H
Green	C	O	B	G
Yellow	L	A	S	E
Red	N	T	I	R
